

AGILUM™

Provider Analytics

## Gain real-time insight into your practice's financial performance

Independent and hospital-owned provider practices find it increasingly difficult to collect and understand their group's overall financial health and performance. Current methods of reporting and analysis are still manual, are usually done through Excel or external consultants, and are often cumbersome — or inaccurate. Agilum's Provider Analytics module changes that, helping your finance team readily monitor and improve practice performance to drive better outcomes across the group.

- Ability to analyze trended data points specific to the provider
- Historic and aging A/R analyses by payer & patient
- High-level executive analysis reflecting relevant key stats and operating measures

## Let your data support your decisions

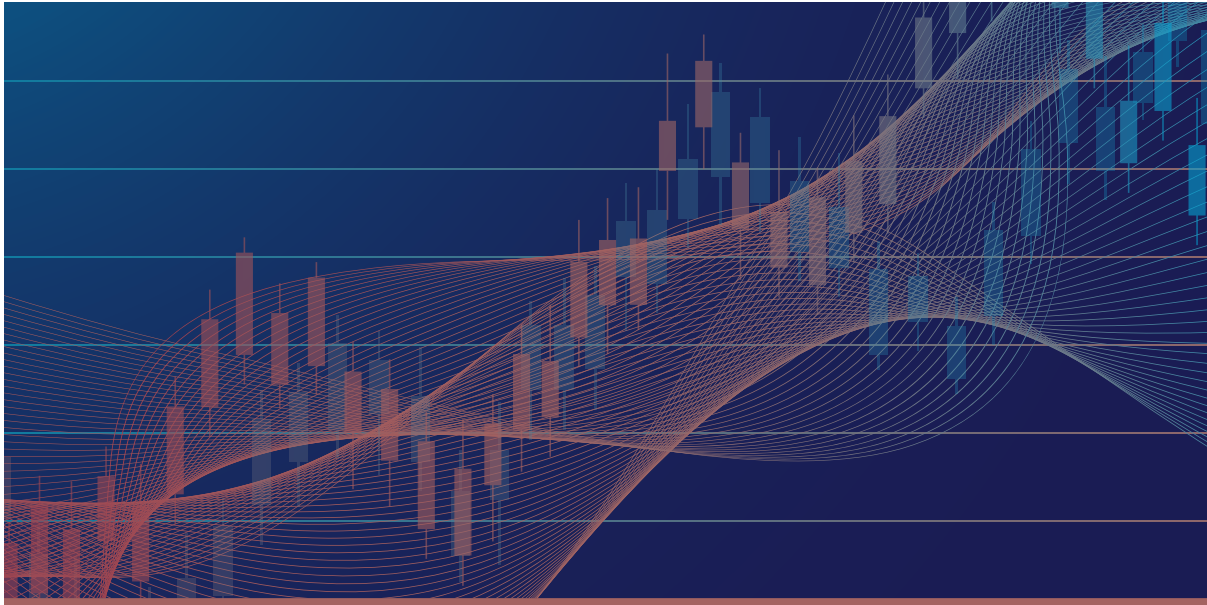

**Provider Analytics** is an Agilum strategic planning module designed to help you:

1. Benchmark against both internal and external data points

2. Enable administration to measure provider compensation against productivity targets

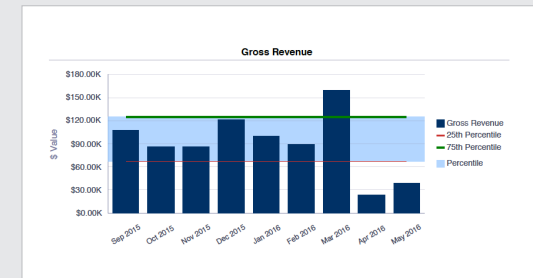

Current Month	Previous Month	6 Month Avg
523	1K	1K
Higher Values Desirable	Higher Values Desirable	Higher Values Desirable

**Executive overview highlights patients and RVUs** High-level analysis reflects relevant key stats and operating measures to give you a day-to-day snapshot.

## Managing practice performance just got easier

- Automation to boost overall financial efficiency throughout your practice
- Measurement and monitoring of volumes, payments, and adjustments
- Ability to align provider compensation around consistent and accurate metrics
- Data available at patient transaction level
- Powerful drill-down capability with easy access to historical data
- Ability to enter internal and external benchmarks
- Flexible user security levels
- Easy-to-read reports that can be exported to Excel and email

**Provider metrics offer volume, charge and RVU detail.** Detailed and customizable charts let you evaluate trended, provider-specific data points

### About Agilum

Experience a new kind of healthcare business intelligence. Agilum Healthcare Intelligence delivers the real-time, real-world insights you need to improve outcomes, while lowering the cost of care.
